PROFESSIONAL SUMMARY

BS Information Technology graduate from BZU Multan with a focus on Flutter development. Built a full-stack farmer-to-buyer marketplace app using Flutter and Firebase, with authentication, real-time data, and role-based access, as well as a desktop event management system in C# and .NET. Enjoys turning ideas into practical, working software that people can actually use.

TECHNICAL SKILLS

Flutter | Dart | Firebase Authentication | Cloud Firestore | Firebase Storage | MySQL | Android Studio | C# | .NET Windows Forms | State Management | REST APIs | Git | Testing Frameworks | OOP | CRUD Operations | UI/UX Design | Canva | MS Office

SOFT SKILLS

Leadership | Teamwork | Communication | Creativity | Decision Making | Problem Solving

WORK EXPERIENCE

USA Driver Recruiter (Freelance)
Remote, Pakistan | Apr 2025 - Present
- Sourcing and qualifying Class A CDL driver leads for carriers across the USA.
- Reaching out to drivers via WhatsApp and phone to discuss carrier opportunities, pay, home time and dispatch terms.
- Matching drivers with US carriers and coordinating the placement process.
- Worked directly with both drivers and carriers to resolve mismatches on pay, home time, and dispatch terms.

Sales Representative
IBN Trucking LLC, Multan, Pakistan | Jun 2024 - Sep 2024
- Cold calling, closing leads, and customer handling.

PROJECTS

Direct Crop Exchange System
Flutter + Firebase | Mar 2026 - Apr 2026
- Built a full-stack agricultural marketplace app connecting farmers directly with buyers, with the potential to scale across the Pakistani market.
- Integrated Firebase Authentication, Cloud Firestore, and Firebase Storage for secure user management, real-time database operations, and crop image handling.
- Implemented CRUD workflows and role-based access control for farmers and buyers, designed around direct trading without intermediaries.

Event Management System
C# Windows Forms + .NET | Sep 2024 - Jan 2025
- Developed a CRUD desktop application using C# Windows Forms and .NET Framework.
- Implemented database connectivity and data management features for efficient record storage, retrieval, updating, and deletion.

- Designed a user-friendly graphical interface with event-driven programming.
